

First Manufacturing are proud to announce a new product.

# LED EDGE ILLUMINATED PANELS

We are able to produce illuminated LED edge lit panels which provide an even spread of illumination on panels up to 3m x 1.2m. Our panels are only 15mm in thickness and are available in a variety of differing options, sized to your exact requirements. Cool White, Warm White, RGB with DMX controllers, Glass faced, Opal acrylic faced and CNC cut shapes.

## Applications include:

Illuminated display units | Counter fascias | Lightboxes with Duratan graphics | Signage | Illuminated Glass splashbacks

With our extensive knowledge & production facilities we are willing to explore any application
